1 Introduction

The STACKFORCE Protocol Stacks are sold as “License Packages”, containing software, legal and commercial elements, which are mandatory or optional for the use of our protocol stacks. We provide different licensing options for both small and large quantities.

Usually, customized upgrades of individual elements within a License Package are possible – on request to sales@stackforce.com, we will provide a customized quotation.

Thus, a suitable License Package is available for every IoT project. We will be happy to advise you on this!

A License Package consists of:

2 License Package Professional

2.1 Overview

The **Professional License Package** is designed for customers who require easy commercial entry with clearly defined production volumes. This package offers optimized unit pricing based on a predefined number of licenses. Licensees additionally benefit from maintenance and support services.

Key characteristics:

- Pre-paid licenses at a reduced unit price
- Higher volumes enable higher price reductions
- Support and maintenance included
- Purchased licenses remain valid until they have been used
- To extend the number of licenses purchased, a new order needs to be placed and paid

2.2 Support and Maintenance

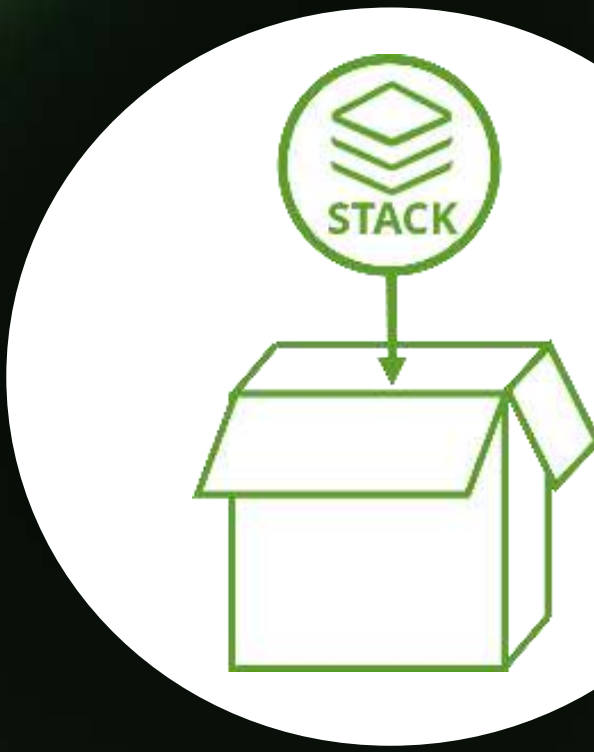

The Professional License Package includes a defined support budget based on the number of licenses purchased, as shown below[1]:

License Volume	Included Support
< 10.000 licenses	4 hours
< 100.000 licenses	8 hours
< 1.000.000 licenses	16 hours
≥ 1.000.000 licenses	32 hours

All details regarding support are specified in STACKFORCE's "*Standard Support Conditions*" document, which is available on our website stackforce.com.

Maintenance ensures continued access to software improvements and updates beginning from purchase date. All details regarding maintenance services are specified in STACKFORCE's "*Maintenance Service Overview*" document, which is available on our website stackforce.com.

[1] The included maintenance period begins on the purchase date and remains valid for 12 months. Unused support hours expire at the end of this period and cannot be carried forward, refunded, or credited
